- Affordable
- No scarring
- Minimal pain
- Removes most colors
- Works on all skin types
- Proven safe and effective

Dr. Ferguson employs the Cutera enlighten[®] system – the most advanced technology available for the safe and effective removal of tattoos and skin pigmentation. The enlighten[®] system offers the flexibility of operating on multiple wavelengths and pulse durations. This allows for the removal of any tattoo regardless of its size, depth, shape or color palette. Best of all, each enlighten[®] treatment is designed with patient comfort in mind, and can be performed in a series of quick and easy in-office visits.
